

FM translator service provides a much needed service to our community in Arizona as well as many others across our nation. Low Power FM should not take priority over these translator stations. K-LOVE, a national service provides positive and encouraging programing over many translator stations. This is important to communities all across America. With so much negative, immoral and alternative programing, our community needs service like K-LOVE to provide a balanced and wholesome choice. I believe the absence of stations like K-LOVE, which broadcast on many translators would have a negative effect on communities like ours in the greater Phoenix area.
